Overview

Penrith RSL Club wanted to give it's members and guests a new look and sense of style to it's club. It required a design and construct builder who could deliver a high end quality refurbishment result and manage the works so the Club's operations could continue. It was unsurprising the Club chose Network Refurbishments & Construction to be charged with this major design and construct refurbishment project, benefitting from a project team with open communication and commitment on delivering a high quality project.

Minimising Disruption

As the project was taking place within a live environment, the client needed Network Refurbishment and Construction to ensure minimal disruption to its operations and Club patrons. There was continuous consultation with the Club in regard to noisy activities and other building works being undertaken to minimise inconvenience to patrons and staff.

Complex Elements

The key challenge of this project was the refurbishment of an existing Club. Along with the intricate nature of a functioning club, was the need to redesign the bar and cashier areas to provide new look, increase efficiencies of staffing, and be able to service the increasing number of patrons to gaming, lounge and entertainment areas.

Programme

Network Refurbishment & Construction was charged with ensuring minimal disturbances to the Clubs operations.
