Overview

The Fraternity Club wanted to give it's members and guests a new look and style to there club. The clubs brief to Network was to create a master plan that would allow the club to be able to financially remodel, extend and update there existing facilities.

The Club benefitted from a project team with open communication and commitment to delivering a high quality project on time.

Minimising Disruption

As the project was taking place within a live environment, the client needed Network Refurbishments & Construction to ensure minimal disruption to its operations and patrons. There was continuous consultation with the Club in regard to noisy activities taking place and also demolition works were conducted to minimise inconvenience to patrons and staff.

Complex Elements

The club needed a high end quality design and refurbishment as well to give a more efficient floor plan, and to link together the outdoor gaming room to indoor gaming room

Tight Programme

Time was a premium and the Club's need was to continue to operate with minor disturbances to its operations
