Overview

Windang Bowling Club wanted to give it's members and guests a new look and style to the club. The clubs brief to Network was to create a master plan for its club that would allow the club to be able to financially remodel and update there existing facilities for there club patrons and there guests.

The Masterplan needed to include for the following as the clubs main criteria:

- New outdoor and indoor gaming rooms.
- New main bar & Function room bars.
- Design and extend existing kitchen and redesign and renovate existing Dining Room.
- New Multi purpose Function rooms.
- New Entry.
- New TAB & Lounge area
- Relocate of Administration offices.
- Renovate existing Boardroom/Meeting Room.
- Construct new Toilets for club patrons.

Minimising Disruption

As the project was taking place within a live environment and there was an issue with limited access for internal construction works. Network Refurbishment & Construction was mindful to minimise disruption to the Clubs operations and club patrons.
