Blacktown RSL Club

Project Type
Design & Construct

Delivery Model
Lump Sum
Fixed Price

Location
Blacktown NSW

Completed
February 2014

Duration
4 weeks

Overview

Blacktown RSL Club wanted to give its members a whole new look to its existing gaming lounge, which was also to incorporate and implement more player privacy achieved through an improved layout and screens. The brief was also to increase space to increase the number of machines to the outdoor gaming lounge.

Network Refurbishments & Construction worked closely with the Club's Gaming Consultant Tony Donnelly.

Minimising Disruption

As the project was taking place within the existing gaming lounge, the client needed Network Refurbishments & Construction to ensure minimal disruption to its gaming operation and Club patrons. There was continuous consultation in regard to when building activities could take place and how works were conducted to minimise inconvenience to patrons and staff.

Timely Delivery

Time was a premium, with only four weeks to complete the project. In addition, the Club's gaming lounge had to continue operating with minor disturbances. Network Refurbishments & Construction was only able to work at night and in the early morning to enable the works to be completed with minimum disturbance to its gaming players.
